WILKIE BELIEVES IN HIGHER PRICES

PRESIDENT OF A CANANEA MINING COMPANY THINKS BIG COPPER INTERESTS ARE UNDECEIVED REGARDING METAL FUTURE.

"I believe the big mines of the country now producing copper can make money with the metal selling at 15 cents a pound in New York."

That was the opinion expressed by James T. Wilkie, president and general manager of the West Cananea Mining company at Cananea, who was in Tucson yesterday, says the Star. He says his company is producing about twenty tons of 12 per cent copper every day, and the recent slump in the price of the metal is not worrying him. They are operating in an open cut 120 feet below the apex of the hill, and are producing their ore cheaply. He declares that general conditions at the Cananea camps are sound at the bottom, despite the fact that the Greene-Cannanea people have laid off several hundred men working in hard ground, under the general agreement of big interests to restrict production. All their soft ground, which is both expensive and dangerous to allow to remain idle, will be worked as before.

Wilkie disagrees with many other copper people in their expressed opinion that the price of the metal will be "pegged" at 15 cents. He believes that what appeared like an unavoidable break, caused by a heavy surplus of copper, was encouraged by big interests now because reserves, while not especially burdensome, were slowly increasing, and if this plain warning was not heeded, the time would come when the copper balloon would go up, with no one with sufficient strength to check it. It was a move to forestall possible disaster. He is of the opinion that the future price of the metal has not yet been fixed, and that it may settle down at 16 or near 15 or 20 cents. It may have been necessary to teach some big interests that copper at 26 cents was neither a normal or a desirable price, and that an organization to make stable metal values was necessary. The United States Steel corporation thus regulates the iron and steel business, with benefit to producers, if not to consumers.

VOLCANIC ERUPTION IN NORTH

Bottom of the Sea Made into Dry Land in Several Places

SEATTLE, Wash., September 26.—Captain Johnson of the revenue cutter Thetis, who arrived here yesterday from an Arctic expedition, confirms with official reports the account of the violent eruption of Mount Makushin, September 11, and the existence of a new peak rising out of the sea, forming part of Begoslov formation. The bottom of the sea was raised until channels which were sufficiently large for the passage of ships are now dry ground. The reports made to Captain Henderson in the north state that there were three other similar volcanic disturbances near the Alaskan coast.
